OUR MISSION AND VISION

LIGHTUP ENTERPRISE

Our mission is to provide a variety of the highest quality cost effective renewable energy products and services to customers that are interested in reducing energy costs and carbon footprint.

Our vision is to be your trusted electrical engineering and solar company and to grow globally.

Lightup Enterprise values include

LIGHTUP ENTERPRISE

- We treat everyone with dignity and respect.
- Excellence and pride in our work.
- Maintain high standard of workmanship and quality products.
- Loyalty, honesty and responsibility in every aspect of our business.
- Promoting a safe work environment.

WHY GO SOLAR?

LIGHTUP ENTERPRISE

Increasing costs:

Electricity prices increasing and getting more expensive.

High electricity bills being a headache.

High demand of electricity to meet therefore renewable energy is the better alternative.

Renewable energy at lower cost and save money long term.

Unreliability:

Eskom is unreliable with all the power failures and load shedding.

Load shedding is part of your daily routine.

Increase in electricity cables being stolen.

Environmentally Friendly:

Solar is a clean source of power and reduce the carbon footprint.

Generates energy from the sun which is for free.

We need energy storage/ back up to keep the lights on when Eskom can't.
